Scotties Notch 9300 N Central Wasatch

Elevation: 9300 ft Aspect: 340°

UT

Sean Hathcock 12/22/2023 - 1:00pm

Co-ord: 40.56492N, -111.67834W

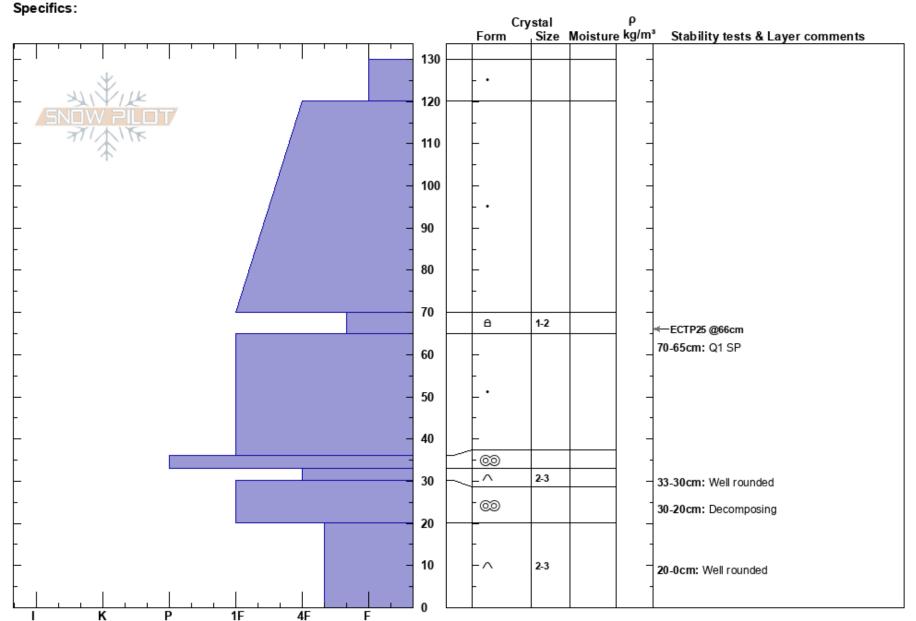

Slope Angle: 33° Wind Loading: no Stability: Good Air Temperature: **HS**:130 **PF**:45 70 **PS**: 15

Layer Notes: 70-65cm: Q1 SP

70-65cm: Problematic layer 33-30cm: Well rounded 30-20cm: Decomposing 20-0cm: Well rounded

Precipitation: NO Wind: Calm

Sky Cover: BKN

**Notes:** Very crusty below 8300ft, turning to dense pow up higher. This was probably one of the less stable areas in the past week of pits. It would seem that more snow/weight could bump up the chance of an avalance in certain areas of this bowl. Also, the PWL in this area is only 60cms below the surface.
