Notes: Route up N side of Tiger Pk with Izzy.

Surface hoar on surface, seen near ridgetop and some N aspects, ave. 4mm.
 Some 1mm (average) Rounding facets near both 12/7 and 12/20 rain crusts. Dug this and 3 additional quick pits on N-NW, NE, E aspects. And quick look at southerly aspect - number more melt freeze/sun crusts and noticeably shallower snowpack.
 Late Nov. SH not found here but was found nearby on same northerly aspect, ECTX.
