

West of Bald Mtn Pass
 Uinta Range
 UT
 Elevation: 10420 ft
 Aspect: 0°
 Specifics:

Mark Staples
 01/23/2018 - 1:00pm
 Co-ord: 40.68051N, -110.91094W
 Slope Angle: 27°
 Wind Loading:

Stability: Good
 Air Temperature:
 Precipitation:
 Wind:
 HS:102
 PF:102 11-0cm: mix of DH and crusts

11-0cm: mix of DH and crusts
 ↙ ECTX

Notes: Step off the sled and you sink to the ground. It's amazing how there's just enough supportability for the sleds to stay on top. ECTX because the snowpack just crumbles beneath the shovel. In this sheltered spot, it's weak but stable. Add wind-loading and it becomes unstable fast.
