Sky Cover: SCT
Precipitation: NO
Wind:

Layer Notes:
120-108cm: Rain 1/27-28
57-55cm: 12/20 Rain crust decomposing
37-33cm: 12/7 Rain decomposing
33-0cm: Problematic layer

Notes: Mostly sunny today and 40's F at 6000. Last 3 days ~.2 - .25" of rain at all elevations.
Entire snowpack at 0C.
ECTP in 2 of the 3 tests here, right under 12/7 rain crust. Crusts are breaking down.
Found similar overall snowpack structure and 11/24 SH faintly on S aspect pit at 6000'.
