

Blossom lake  
 Silver Valley Area  
 ID  
**Elevation:** 6400 ft  
**Aspect:** E  
**Specifics:** We skied slope

Brian Hilland  
 02/19/2024 - 12:00pm  
**Co-ord:**  
**Slope Angle:** 30°  
**Wind Loading:** previous

**Stability:**  
**Air Temperature:** -0.7°C  
**Sky Cover:** OVC  
**Precipitation:** NO  
**Wind:** SW Calm

**HS:** 145  
**PF:** 51 81-50cm: Feb 3rd Crust  
**PS:** 32 81-50cm: Problematic layer

**Notes:** Friends of the Idaho Panhandle Avalanche Center

Techs:  
 Davis / Hilland

"While we've noticed some indications of compression failures within the recent snow layers in the area, we haven't observed any signs of widespread instability within our snow profile. - Avalanche conditions are generally safe at present, with the likelihood of both natural and human-triggered avalanches being low. The snowpack appears stable overall, though it's important to note that a LOW rating doesn't guarantee the absence of avalanche risk in specific terrain. Exercise caution during travel, remain alert to weather changes, and be vigilant for unstable snow near isolated terrain features."
