Layer Notes:
 184-171cm: New snow
 171-168cm: Thin crust
 168-153cm: Some sugary snow present
 168-153cm: Problematic layer
 153-150cm: Slightly sandy/dusty
 [More Layer Comments below]

Notes: Snowpack is quite stable at the moment at this location, but some concerning things present in it: crusts, sandy layer, some sugary snow. Could start to react more and in a worse way with more heavy, wet snow this week and more windloading.. Additional Layer Comments: 100-120cm: Some sugary snow top part;
