

Midnight Mountain ID
 Logan UT
 UT
 Elevation: 8700 ft
 Aspect: 65°

Michael Davis
 03/09/2024 - 1:30pm
 Co-ord: 42.27040N, -111.55900W
 Slope Angle: 28°
 Wind Loading:

Stability:
 Air Temperature: 32°C
 Sky Cover: CLR
 Precipitation: NO
 Wind: Calm

HS:303
 Layer Notes:
 241-239cm: Dirt layer/grappel
 231-230cm: Avi failed @ this layer.
 231-230cm: Problematic layer
 230-228cm: Crust

Specifics: Pit is adjacent to avalanche: flank; Cracking; Recent avalanche activity on similar slopes

Notes: Buried grapple on top of dirt layer. Avi broke on "melt-freeze" crust below dirt layer. Facets found above and below the crust. Radiation-Recrystallization.
