HS:305
 Layer Notes:
 0-23cm: rimed stellers
 42-45cm: Problematic layer
 75-77cm: March 2 Dirt layer

Notes: Pit with JHK. Winds were light blowing from the north. Cloud deck was around 9800' and this snowpit was just below the cloud deck. Riming occurring in the cloud. Clean shear when prying at 95cm from surface after ECTX x 2 on small grained rounding facets. Not a concern in this location all things considered.
