

Amerikanski Ulei
 Rila
 Bulgaria
Elevation: 2140 m
Aspect: NW
Specifics: Ski tracks on slope; We skied slope

Kalin Markov
 17/03/2024 - 17:15
Co-ord: 42.02524N, 23.34781E
Slope Angle: 36°
Wind Loading: previous

Stability: Good
Air Temperature: 1°C
Sky Cover: BKN
Precipitation: NO
Wind: NW Light Breeze

HS: 198
Layer Notes:
 198-196cm: Melt-freeze, formed today
 175-170cm: Problematic layer
 170-164cm: Sandy/dusty
 98-85cm: Sandy/dusty

Notes: There are a few slabs near the surface, but they do not slide easily:
 * For the one at 185cm, a very small crack near the edge is observed around CT15, but it crosses the column fully on CT21 and does not slide at all at this steep location.
 * For the one at 175cm, a crack appears across the whole column suddenly at CT24, but does not slide easily, it breaks up into pieces and slides off by CT26.

2 fairly large glide avalanches noted on southeastern slopes on nearby Baba Peak
