

Under Clayton Pk
 Central Wasatch
 UT
 Elevation: 9960 ft
 Aspect: 300°
 Specifics:

Mark Staples
 02/05/2018 - 10:30am
 Co-ord: 40.59675N, -111.55757W
 Slope Angle: 29°
 Wind Loading:

Stability: Good
 Air Temperature:
 Sky Cover:
 Precipitation:
 Wind:

HS:128
 Layer Notes:
 35-30cm: brown from dust

Notes: Obvious layers of weak facets. I did a cross slope PST when my ECT did not break at all. It was a steep slope, so this does not work as well as it would on a flatter slope or doing a proper PST....but it did propagate across and I suspect a regular PST would have propagated to the end after a 30-40 cm cut. Just speculation though.
