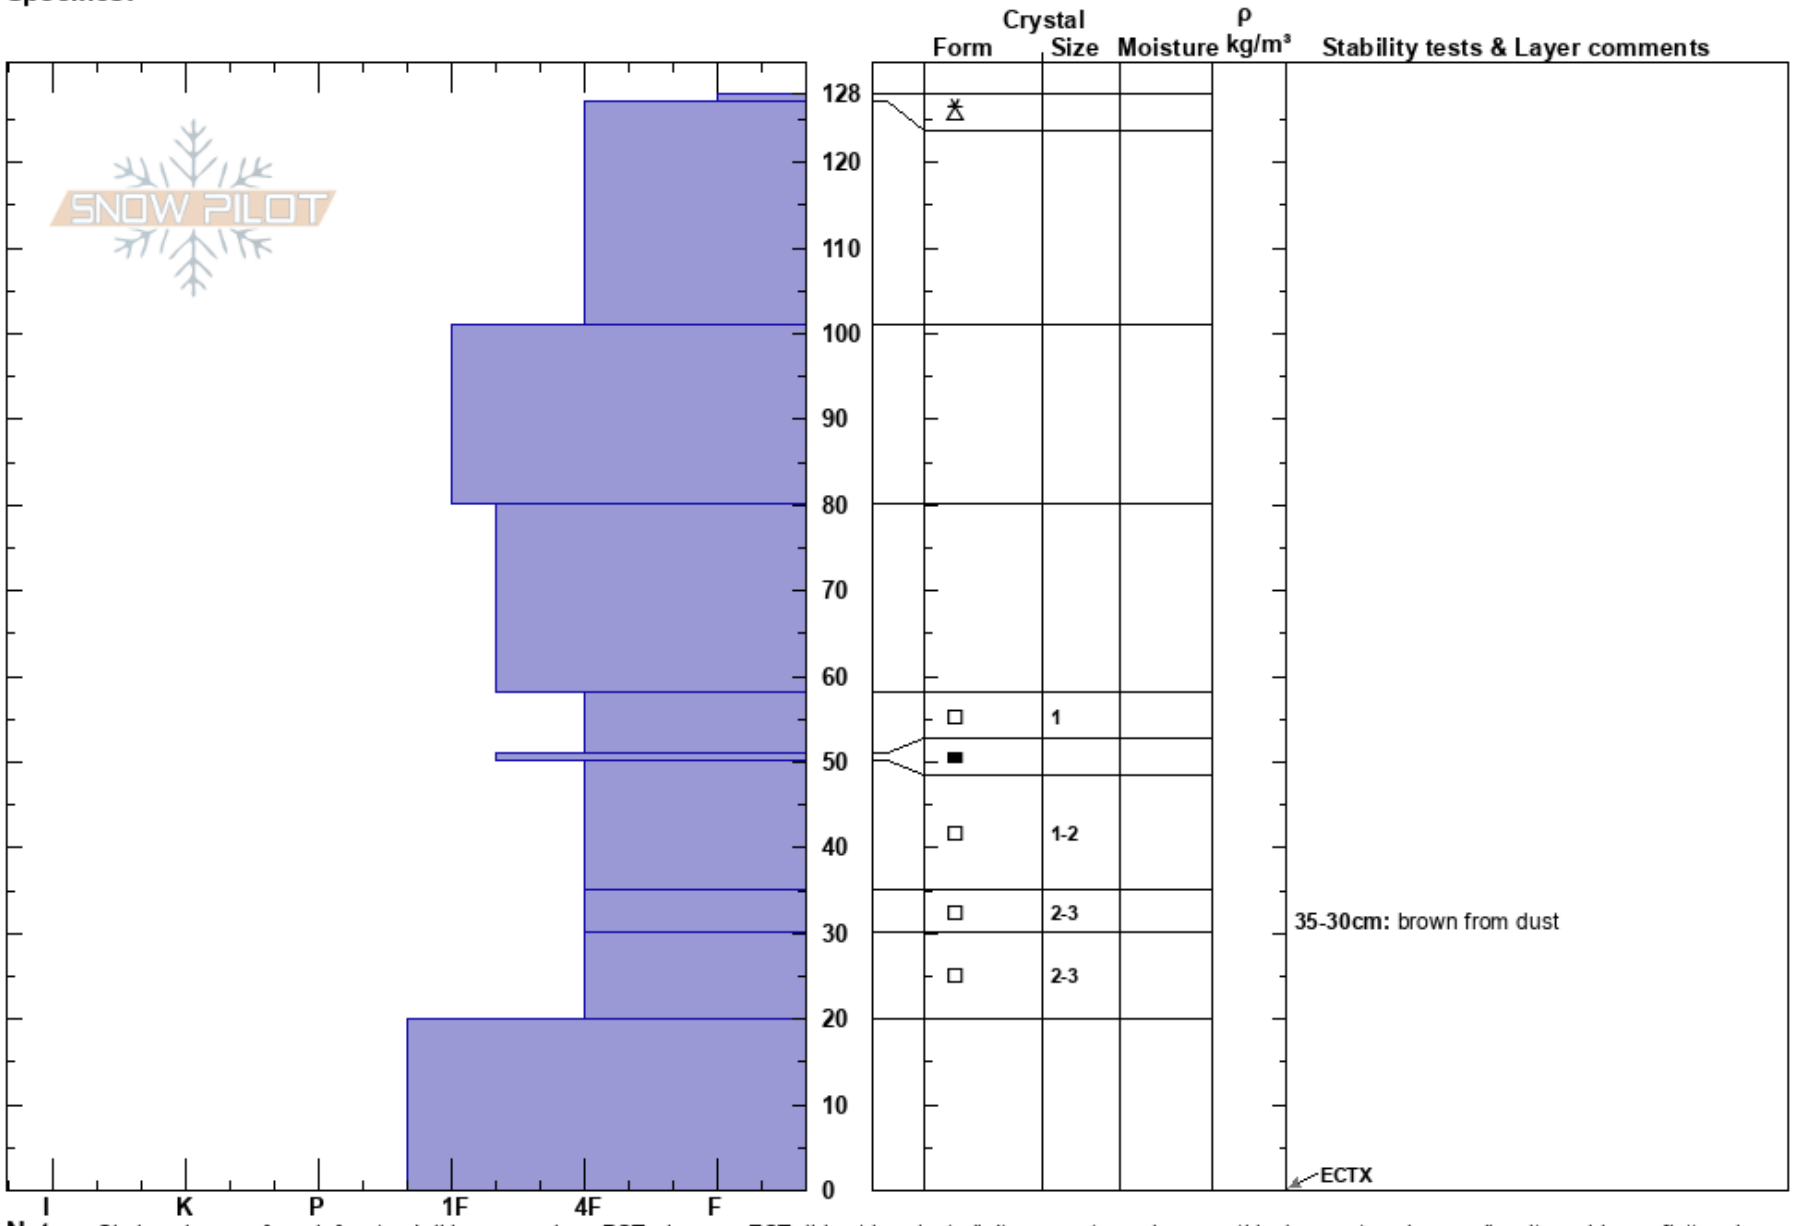
Under Clayton Pk
Central Wasatch
UT
Elevation: 9960 ft
Aspect: 300°
Specifics:

Mark Staples
02/05/2018 - 10:30am
Co-ord: 40.59675N, -111.55757W
Slope Angle: 29°
Wind Loading:

Stability: Good
Air Temperature:
Sky Cover:
Precipitation:
Wind:

HS:128

Layer Notes:
35-30cm: brown from dust



Notes: Obvious layers of weak facets. I did a cross slope PST when my ECT did not break at all. It was a steep slope, so this does not work as well as it would on a flatter slope or doing a proper PST....but it did propagate across and I suspect a regular PST would have propagated to the end after a 30-40 cm cut. Just speculation though.
