Layer Notes:  
137-130cm: Problematic layer  
84-74cm: march 2 dust layer

**Notes:** Pit with SSP/JHK. We elected not to ski the slope based on warming surface and weak snow 6" from surface. Percolation columns from 137-84cm starting under crust. Uniform wet grains unless otherwise marked as slightly wetter. Dust layer at 84-74cm was deteriorating crust.
