Slope Angle: 34°
Wind Loading: no

Stability: Good **HS:**30 **Layer Notes:**
Air Temperature: 1.8°C **PF:**20 26-17cm:Problematic layer
Sky Cover: OVC
Precipitation: S-1
Wind: SW Light Breeze

Notes: Snow depth is very variable at the moment 30cm snow depth is the most consistent I found on the SW 1/4. There is a 3-5 cm breakable crust overlying a facet crust sandwich combo No. 9 to ground. This makes for terrible crampon travel.
