

Numbers
 Tenmile Range
 CO
Elevation: 11818 ft
Aspect: 138°
Specifics:

Michael Hosmer
 11/11/2024 - 8:41am
Co-ord:
Slope Angle: 20°
Wind Loading: previous

Stability:
Air Temperature:
Sky Cover: CLR
Precipitation: NO
Wind: Calm

HS:56
PS: 1
 55-47cm: wind skin?
 37-34cm: wind skin
 21-0cm: no evidence of basal facets

Notes: -Repeated CT twice, both times failed @37 on isolation on a layer of intact precip particles
 -likely no snow on this slope prior to 11/4, the likely reason I did not find any basal facets
