Pilot NW Glades #2 La Sal Mountains

UT Elevation: 10870 ft

Aspect: 306°

Slope Angle: 28° Wind Loading: no Specifics:

Dave Garcia

11/22/2024 - 12:37pm Co-ord: 38.52673N, -109.24267W Sky Cover: FEW

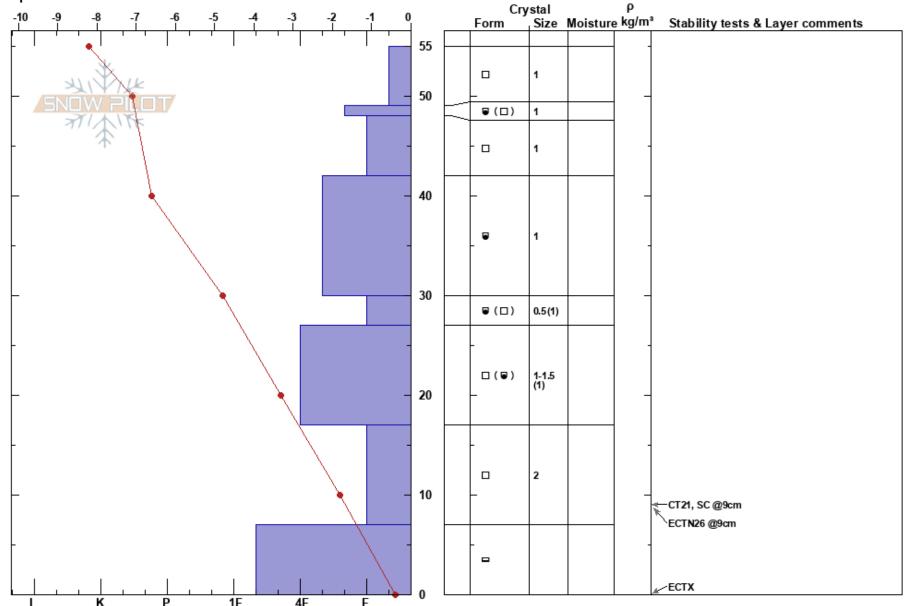

Precipitation: NO Wind: W Calm

Stability: Good

Air Temperature: 0°C PS: 11 17-7cm: Problematic layer Crystal

Layer Notes:

**HS:**55

Notes: Same location as 8 days ago. The slab mid-pack is faceting and getting weaker. Unable to propagate a fracture across the column. No avalanche problem today, but we still have a slab on top of weak, 2mm facets at the base of the pack.
