**Co-ord:** 45.03164N, -109.96731E  
**Slope Angle:** 32°  
**Wind Loading:**

**Stability:**  
**Air Temperature:**  
**Sky Cover:**  
**Precipitation:** RV  
**Wind:**

**HS:**70  
**Layer Notes:**  
 70-69cm: rime crust, 4mm thick  
 57-26cm: Problematic layer

**Notes:** Also, did an ECT 50' away from this snowpit (same aspect, and 33 deg slope angle), and had an ECTN28 on the layer at 26cms (right above the M/F crust).

No collapsing nor cracking today.

The rime crust that formed today actually skied surprisingly/ remarkably well.
