 Co-ord: 40.66122N, -111.64350W  
 Slope Angle: 30°  
 Wind Loading:

Stability: Good  
 Air Temperature:  
 Sky Cover:  
 Precipitation:  
 Wind:  
 HS:102  
 Layer Notes:  
 30-20cm: Problematic layer

**Notes:** ECT would not break on facets at 20-30 cm and we did two in this location. Surprised how willingly the PST fractured to the end after a 35 cm cut. I think this tells us these facets are simply waiting for a load. How much? Seems like it needs to be pretty heavy but not sure.
