 Layer Notes:

Specifics: Pit is adjacent to avalanche: other; Recent avalanche activity on similar slopes; Recent avalanche activity on different slopes

**Notes:** Pit dug on the south shoulder of Mt. Abundance. When we rode away we saw a fresh small avalanche, 3'deep x 10' wide that we suspect we triggered remotely from the low angle ridge above. About 45 minutes later, from a couple miles away, we saw a 4-6' deep avalanche that happened since we had been there 1000' or so up the shoulder from our pit.
