25/01/2025 - 15:45

Stability: Poor

HS:110

Layer Notes:

Finland

Co-ord: 35W 380078E 7497093N

Air Temperature: -7.1°C

PF:20

110-87cm:Problematic layer

Elevation: 400 m

Slope Angle: 24°

Sky Cover: OVC

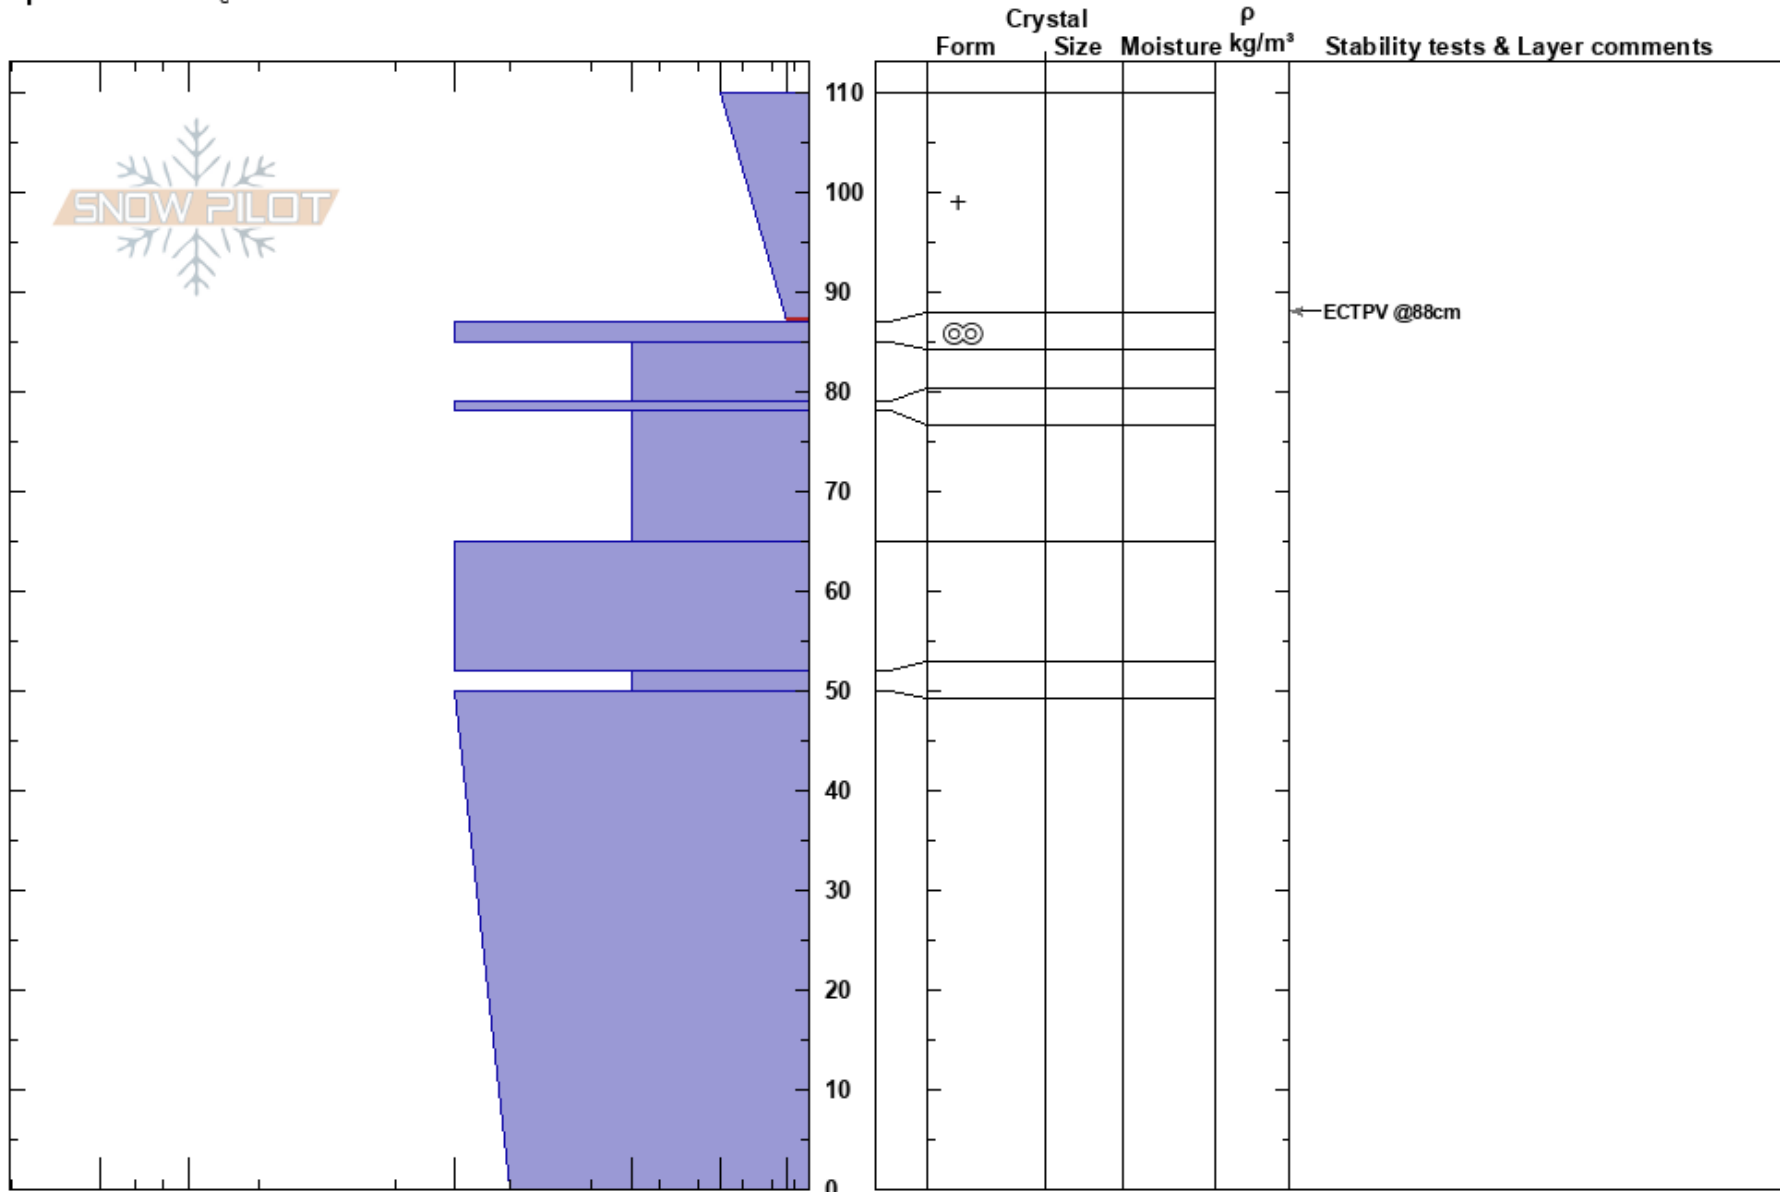

Precipitation: S1

Aspect: W

Wind Loading: yes

Wind: E Strong

Specifics: Cracking

Notes: Looked for how new wind transported snow reacts on specific terrain feature which is prone to collect snow when winds from East. Observed locally rapid wind loading, shooting cracs and corness build up on lee aspects. Generally very thin snowpack, variable HS.
