

Kellostapuli satula

Eeva Mäkelä

26/01/2025 - 13:00

Stability: Good

HS:85

Layer Notes:

Finland

Co-ord: 35W 382563E 7499797N

Air Temperature: -3.7°C

PF:10

70-68cm: Possible future PWL concern

Elevation: 400 m

Slope Angle: 25°

Sky Cover: OVC

PS:10

53-43cm: possible future PWL concern

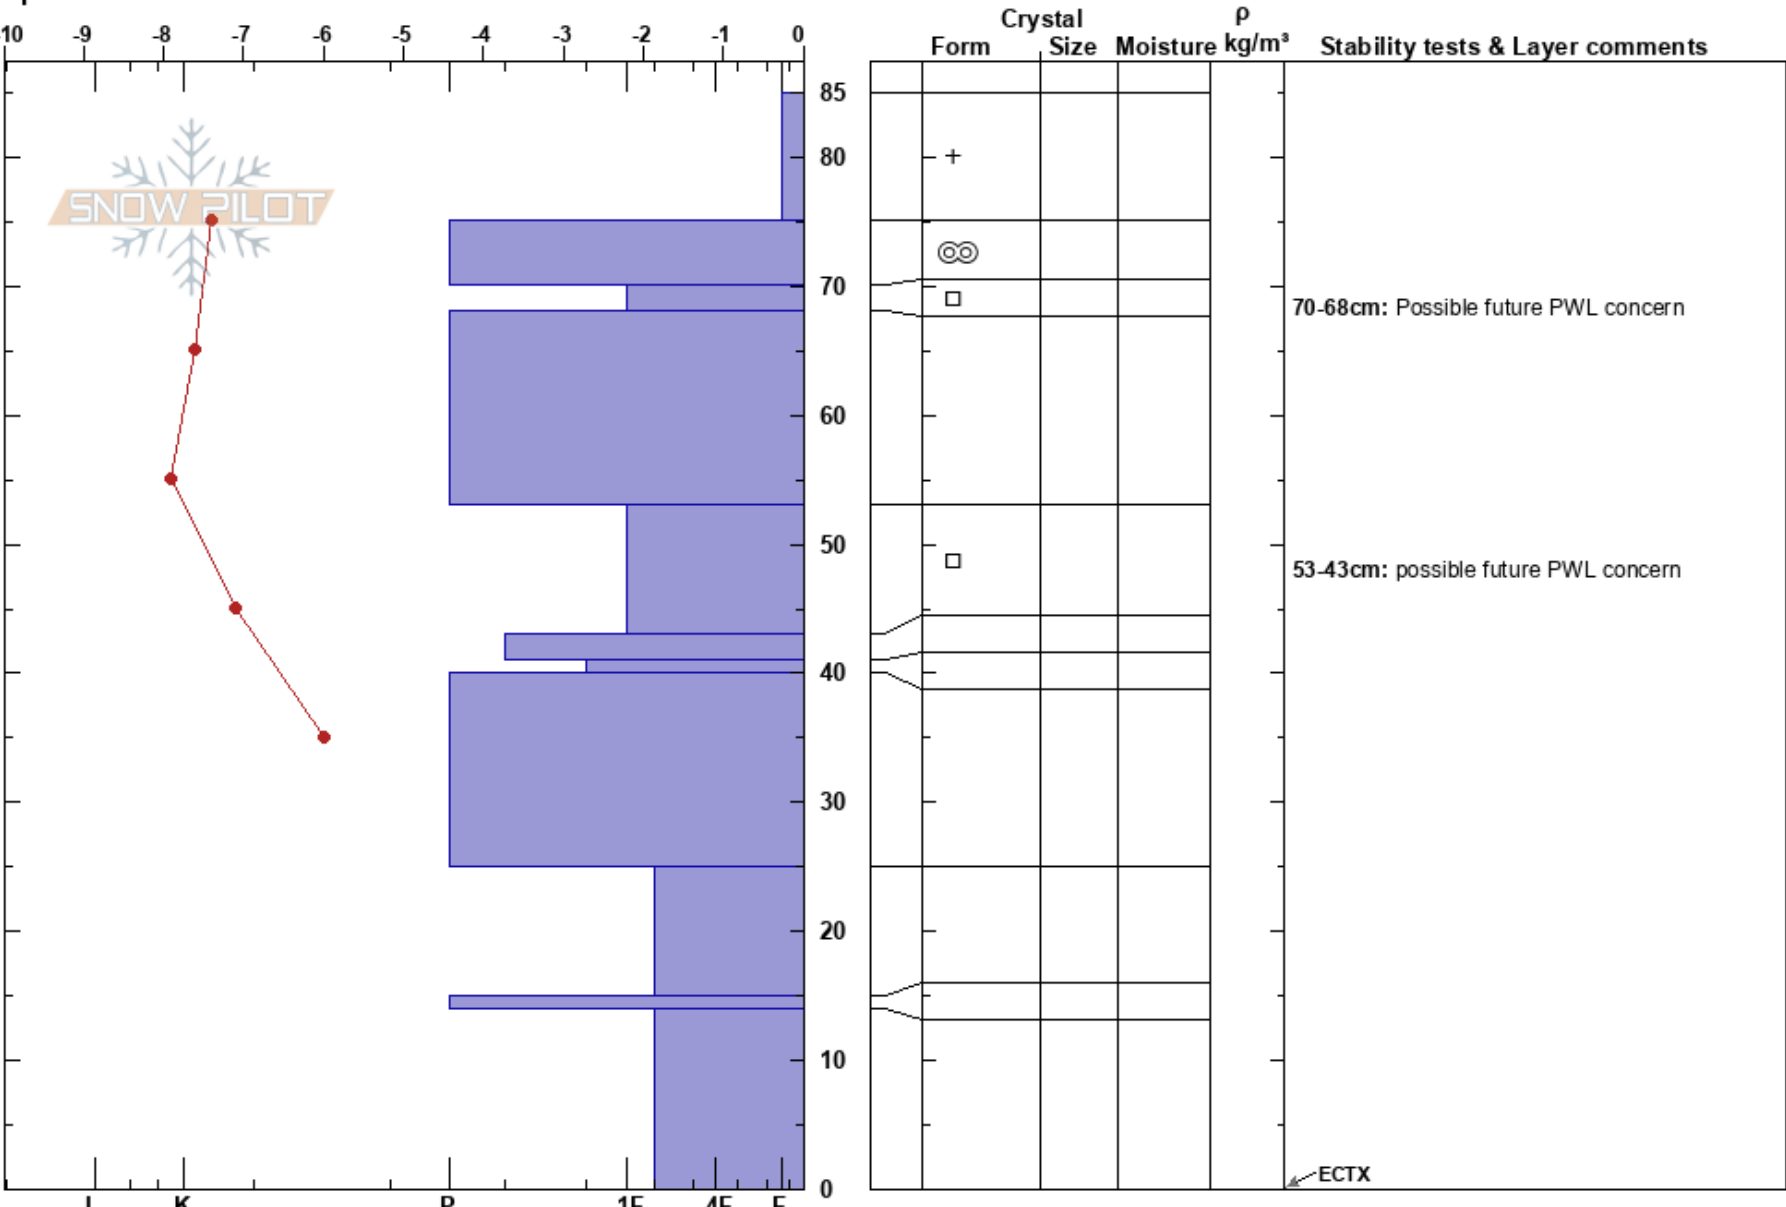

Aspect: N

Wind Loading: previous

Precipitation: NO

Wind: S Light Breeze

Specifics:

**Notes:** Not much wind affect on N aspect starting zones. 10-20cm of soft low density new snow on top which here seemed well bonded to old MfCr. Few FC layers mid pack didn't give reactions. No signs of cracking or whumping. Very variable HS.
