Co-ord:
Slope Angle: 32°
Wind Loading: no

Stability:
Air Temperature: -6°C
Sky Cover: BKN
Precipitation: S-1
Wind: SW Calm

PS: 25
Layer Notes:
19-16cm: Problematic layer

Elevation: 5300 ft
Aspect: 350°
Specifics: Pit dug in a Ski Area; Pit is representative of backcountry

Notes: This pit was done with the intention to find the January sun crust and interpret how the recent storm snow is interacting with it.
