**Co-ord:** 37.66548N, -107.84039W  
**Slope Angle:** 38°  
**Wind Loading:** yes

**Stability:** Fair **HS:** 130 **Layer Notes:**  
**Air Temperature:** 12°F **PS:** 35 85-84cm: Problematic layer  
**Sky Cover:** OVC  
**Precipitation:** S1  
**Wind:** S Moderate

**Notes:** Upper slab supportive to skier weight but PB (95cm) almost to ground. No obvious signs of instability. Avalanches triggered by light loads initiated in upper snowpack will likely step down to basal layers.
