 Co-ord: 44.84853N, -111.21677W
 Slope Angle: 38°
 Wind Loading: no

Stability: Fair Stable HS:115
 Air Temperature: -5°C
 Sky Cover: OVC
 Precipitation: NO
 Wind: SW Calm
 Layer Notes:
 58-52cm: Problematic layer

Notes: This pit was dug in the flank of a recent persistent slab avalanche. We got stable results in our stability tests on the layer the slide failed on. This is likely due to the layer having already collapsed.
