

Mine Bender
 Pioneer
 ID
 Elevation: 8610 ft
 Aspect: 20°
 Specifics:

peter carse
 04/29/2018 - 1:45pm
 Co-ord: 43.62510N, -114.25603W
 Slope Angle: 24°
 Wind Loading: no

Stability:
 Air Temperature: 5°C
 Sky Cover: BKN
 Precipitation: NO
 Wind: SW Moderate

HS:115
 PF:20
 115-108cm: melted MF
 108-95cm: frozen MF
 25-0cm: Problematic layer

Notes: No skiing today, but always fun to see a CTV. Accessed by hiking up south slopes from Ohio Gulch. Probably not enough snow volume remaining in track to impact East Fork / Triumph below, if it did slide. Weak crust holding things together, and cool weather forecasted for the coming week, should keep similar slopes from becoming ugly again soon. No obvious evidence of preferential flow.
