Layer Notes:
 71-78cm: Problematic layer

Notes: Pit dug by Mark R, Tim and Angus. Actively wind-loading out of the west, moderate winds gusting to strong, top 16cm of wind loading nonreactive to skis yet reactive on CTs with a slight wind skin on top. Otherwise a fairly well-consolidated snowpack with a few small facet layers around 70 down that produced some results. HS greater than probe.
